of things must be pain and weakness which continued long enough, and in absolute prostration and certain death.

Well, then, she failed to get up her strength under the treatment of either doctor. Why? Simply because the medicines they gave her—whatever they may have been—did not cure the torpid and inflamed stomach. If they had cured it then she would have got up her strength exactly as the afterwards did when she took Beger's Syrup. But the trouble is this: Medicines that will do this are rare. If the doctors possess them they would use them, and cure people with them, of course. Mother Beger's is one of these rare and effective medicines. If there is another as good the police has not yet been made acquainted with the fact. But even the Syrup does not cure the stomach, it is not a so-called "tonic," there is no such thing. It (the Syrup) cures the disease, drives out the poison, repairs the machine.

Then comes the appetite (all of itself) and digestion and strength. You see the order—the sequence. Yet, well, please bear it in mind. The mechanics of the engine in order; then the stoker gets up the steam.

And of the human body—the nobility of all machines—Mother Beger's Syrup is the skilled mechanic.—Ad.

Intimations.
